

```
#include <iostream>
using namespace std;

int main() {

    string* sp = new string;
    *sp = "def";
    cout << sp << endl;
    cout << *sp << endl;

    string s = "abc";
    //getline(cin, s);
    cout << s << endl;

    s = "defdef";
    cout << s[0] << endl;
    s[0] = 'a';
    string s1;
    s1 = "def";

    string s2 = s + s1;
    cout << s2 << endl;

    s += s1;

    cout << s1 << endl;
    cout << s << endl;

    cout << s.size() << endl;
    cout << s.substr(3) << endl;
    cout << s.substr(3, 3) << endl;

    cout << s.find("def") << endl;

}
```
